SUPPLEMENTAL EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Frommer on August 2nd, 2005.

The application has been amended as follows:

2. Replace claim 74 with - -

A substrate structure for biological neurite outgrowth, with the capability of undergoing many cycles of switching, comprising: a) a basic substrate and b) an alignment layer on said basic substrate, with a mono- or multi-layer of liquid crystal material on said alignment layer, or a combined alignment layer on said basic substrate, wherein said combined alignment layer includes a liquid crystal, and said combined alignment layer further comprises polymeric material selected from the group consisting of polyester, polypeptide, polyacrylamide, polyvinylalcohol, polyacrylate, polymethacrylate, polyurea and polyamide, or at least one type of azosilane; wherein said substrate structure for biological neurite outgrowth has at least one biological neuron on top of said mono- or multi-layer of liquid crystal material, or on top of said combined alignment layer which includes a liquid crystal; and wherein the orientation of the alignment layer or the combined alignment layer, and thereby the

Art Unit: 1772

direction of biological neurite outgrowth, is controllable and changeable during the growth process of the biological neuron. - -

- In claim 91, substitute line 1 with - The substrate structure according to claim74, wherein said polypeptide is selected from -
- 4. In claim 91, lines 4-5, "wherein X is selected ... and wherein k, n and I are selected from the range: 1≤(k or 1 or n)≤", delete " the azobenzene chromophore is defined as in claim 86, ".
- 5. In the specification, page 1, below the title "Method for providing a substrate ...", insert header - Background of the Invention -
- 6. In the specification, page 1, Insert as Line 1 - This application is a 371 of PCT/EP00/04517 filed May 18, 2000. -
- 5. In the specification, page 3, above the fourth paragraph of "It is therefore an object of the present invention to provide a substrate structure enabling a ...", insert header - <u>Summary of the Invention</u> -
- 6. In the specification, page 3, delete the last paragraph of "This object is solved by a method according to claim 1, a substrate structure according to claim 30 and a device for monitoring cell or neuron activity according to claim 52 and by a".
- 7. In the specification, page 4, delete first paragraph "use according to claims 72 and 73. Claims 2 to 29, 31 to 51 and 53 to 71 show advantageous features or embodiments of the inventive method, substrate structure or device."

Application/Control Number: 09/744,113 Page 4

Art Unit: 1772

8. In the specification, page 4, above the fourth paragraph "With the present invention, a self assembly preparation of oriented surfaces will be allowed ...", insert header - - Detailed Description of the Invention - -

- 9. In the specification, page 15, above the fourth paragraph "Fig. 1 schematically ...", insert header - Brief Description of Drawings -
- 10. Above the seventh paragraph "Fig. 1 shows the structure of an embodiment of the inventive substrate 5 ...", insert header - <u>Detailed Description of Drawings</u> -
- 11. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Clean copies with no smudges should be resubmitted. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance: the closest prior art of record US 5,510,628, fails to teach or suggest, even with US 5,686,549 and US 6,061,113, the combination of a substrate structure for biological neurite outgrowth, with the capability of undergoing many cycles of switching, comprising: a) a basic substrate and b) an alignment layer on said basic substrate, with a mono- or multi-layer of liquid crystal material on said alignment layer, or a combined alignment layer on said basic substrate, wherein said combined alignment layer includes a liquid crystal, and said combined alignment layer further comprises polymeric material selected from the group consisting of polyester, polypeptide, polyacrylamide, polyvinylalcohol, polyacrylate, polymethacrylate, polyurea and polyamide, or at least one type of azosilane; wherein said substrate structure for biological neurite outgrowth has at least

Application/Control Number: 09/744,113

Art Unit: 1772

one biological neuron on top of said mono- or multi-layer of liquid crystal material, or on top of said combined alignment layer which includes a liquid crystal; and wherein the orientation of the alignment layer or the combined alignment layer, and thereby the direction of biological neurite outgrowth, is controllable and changeable during the growth process of the biological neuron. None of the references teaches a biological neuron on top of liquid crystal material aligned by an alignment layer, or on top of a combined alignment layer which includes a liquid crystal, wherein the orientation of the alignment layer or combined alignment layer is changed to control the direction of neurite outgrowth during the growth process of the biological neuron. See Applicant's arguments dated 06/30/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Sow-Fun Hon whose telephone number is (571)272-1492. The examiner can normally be reached Monday to Friday from 10:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon, can be reached at (571)272-1498. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.
